If possible please identify (*) people who will participate in the experiment and one person (**) who will be responsible for all practical decisions regarding the experiment.

Is this a proposal for the EU Access programme?

Do you expect to continue this project after this experiment?

Anticipated need for future beam-time?

Instrument:

Days requested:

Instrument description: <http://neutron.ujf.cas.cz/instruments/lvr15>

Abstract

Sample

Substance: Powde Single crystal Liquid Glass Polycrystalline solid

Elemental formula:

Sample size [mm] / weight [mg]:

Number of samples:

Space group:

Unit cell parameters:

Sample environment

1.

2.

Required sample environment parameter: (for ex. specify temperatures, tension/compression parameters, etc.)

Security aspects

Sample is toxic

Sample is explosive

Sample is radioactive

Other hazards or special precautions:

Other facilities required

Specify details and check the availability with instrument responsible:

Scientific background

(if more space needed provide additional PDF document)
(pictures can be added in the separate PDF document)
